

IN THE CLAIMS:

1. (Currently amended) A clock comprising a first hand to indicate day of the week, the first hand mounted on a first shaft and driven by a first day gear and a third day gear, and a second hand to indicate hour, the second hand mounted on a second shaft, a third hand to indicate minutes, the third hand mounted on a third shaft, the first hand, and second hand, and third hand sharing a common axis of rotation, the first shaft and second shaft being concentric with respect to each other, wherein the third day gear provides one revolution to the first day gear for each 14 rotations of the second hand, and a second day gear provides manual adjustment to the first hand.
2. (Cancelled) The clock of claim 1 wherein said said first hand is powered by at least one gear having a rotation cycle of 7 days.
3. (Cancelled) The clock of claim 2 wherein said gear communicates with at least one other gear that competes 14 revolutions in said cycle.
4. (Cancelled) The clock of claim 3 wherein said other gear actuates at least one hand to indicate hours.
5. (Previously presented) The clock of claim 1 wherein said first hand and second hand are powered by quartz oscillation.
6. (Previously presented) The clock of claim 1 wherein said first hand and second hand are powered by battery power.

7. (Previously presented) The clock of claim 1 further comprising means for adjusting time indicated by said clock.

8. (Previously presented) The clock of claim 1 wherein said adjustment means comprises at least one knob.

9. (Previously presented) The clock of claim 1 wherein said adjustment means comprises at least one knob to adjust said first hand~~day~~ indicator.
